

Lab Challenge: The Campus Network Problem

Scenario: Your college has opened a new building with three separate labs:

- **Coding Lab:** 20 computers
- **AI Lab:** 10 computers
- **Robotics Lab:** 5 computers

You have been given the private network:

192.168.11.0/24

Your task is to design and test the network in **Newton Packet Tracer**.

In each Network you can take minimum 2 devices.
